

8/31 - 9/04/2012

Incident:
Juneberry road

Date:
8/31/2012

Shift:
Day

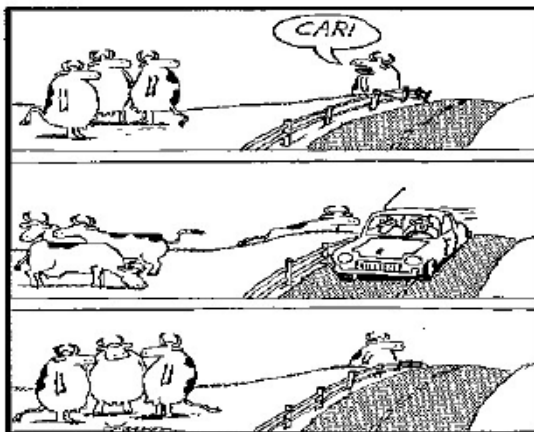

Safety Message Safety Message

The fire is going through a transition today with a downsizing of teams and lots of demobs. Remember, ICP safety is every bit as important as fireline safety. A few key points to keep in mind are:

Use a spotter when backing vehicles in congested parking lots

- Watch for tripping hazards (extension cords, boxes, etc.)
- Lift with your legs, not your back. Better yet, get help to lift heavy objects
- Wear gloves when handling equipment that could pinch or sliver.
- Be careful driving home: wear your seatbelt, use your headlights and drive defensively.

AND WATCH FOR LARGE

ANIMALS ON THE ROAD!

Safety Officer
Mike Hanson

FIRE WEATHER PLANNING FORECAST FOR E ND...NW AND WC MN
NATIONAL WEATHER SERVICE GRAND FORKS ND

.DISCUSSION...

MAIN CHALLENGE FOR THIS FORECAST APPEARED TO BE FIRE WEATHER CONDITION POTENTIALITY FOR SATURDAY...DOESN'T LOOK LIKELY NOW AS WINDS AND HUMIDITY SHOULD REMAIN BELOW CRITERIA DURING THIS VERY WARM DAY. PRIOR TO THAT...NOT MUCH GOING ON AS SHOWERS ASSOCIATED WITH AN EARLIER COLD FRONTAL PASSAGE HAVE EXITED THE EASTERN FORECAST AREA. FRIDAY WILL BE SUNNY WARM AND DRY WITH A LIGHT WIND. A FEW SHOWERS ARE POSSIBLE OVER THE DEVILS LAKE BASIN AT TIMES ON SATURDAY...WITH A BETTER CHANCE FOR WIDESPREAD MOISTURE ON SUNDAY.

300 PM CDT THU AUG 30 2012

.TONIGHT...

SKY/WEATHER.....MOSTLY CLEAR. MIN TEMPERATURE.....47-52. 24 HR TREND.....14 DEGREES COOLER.
MAX HUMIDITY.....73-78 PERCENT. 24 HR TREND.....11 PERCENT LOWER.
20-FOOT WINDS.....NORTHWEST WINDS UP TO 5 MPH. LAL.....1. PRECIPITATION.....NONE.

.FRIDAY...

SKY/WEATHER.....SUNNY. MAX TEMPERATURE.....77-82. 24 HR TREND.....LITTLE CHANGE.
MIN HUMIDITY.....26-31 PERCENT. 24 HR TREND.....LITTLE CHANGE.
20-FOOT WINDS.....NORTHWEST WINDS AROUND 5 MPH SHIFTING TO THE EAST UP TO 5 MPH IN THE LATE MORNING AND EARLY AFTERNOON...THEN INCREASING TO AROUND 10 MPH LATE IN THE AFTERNOON.
LAL.....1. PRECIPITATION.....NONE. HOURS OF SUNSHINE...11. HAINES INDEX.....5 (MODERATE).
SMOKE DISPERSAL.....FAIR (AROUND 18500 KNOT-FT). MIXING HEIGHT.....AROUND 5500 FT AGL.
TRANSPORT WINDS.....NORTH AROUND 5 MPH SHIFTING TO THE NORTHEAST IN THE AFTERNOON.

.FRIDAY NIGHT...

SKY/WEATHER.....PARTLY CLOUDY. MIN TEMPERATURE.....50-55. 24 HR TREND.....LITTLE CHANGE.
MAX HUMIDITY.....85-90 PERCENT. 24 HR TREND.....17 PERCENT HIGHER.
20-FOOT WINDS.....SOUTHEAST WINDS UP TO 5 MPH. LAL.....1. PRECIPITATION.....NONE.

.SATURDAY...

SKY/WEATHER.....MOSTLY SUNNY. MAX TEMPERATURE.....79-84. 24 HR TREND.....LITTLE CHANGE.
MIN HUMIDITY.....34-39 PERCENT. 24 HR TREND.....7 PERCENT HIGHER.
20-FOOT WINDS.....SOUTHEAST WINDS 10 TO 15 MPH. LAL.....1. PRECIPITATION.....NONE.

.FORECAST DAYS 3 THROUGH 7.....

.SATURDAY NIGHT...MOSTLY CLOUDY. CHANCE OF SHOWERS AND THUNDERSTORMS. LOWS IN THE MID 60S. SOUTH WINDS AROUND 15 MPH.

.SUNDAY...PARTLY SUNNY. CHANCE OF SHOWERS AND THUNDERSTORMS. HIGHS IN THE MID 80S. SOUTHWEST WINDS AROUND 10 MPH.

.SUNDAY NIGHT...PARTLY CLOUDY. SLIGHT CHANCE OF SHOWERS AND THUNDERSTORMS. LOWS IN THE UPPER 50S. WEST WINDS AROUND 5 MPH.

.LABOR DAY...SUNNY. HIGHS IN THE UPPER 70S. WEST WINDS AROUND 10 MPH.

.MONDAY NIGHT...MOSTLY CLEAR. LOWS IN THE MID 50S. NORTHWEST WINDS AROUND 5 MPH.

.TUESDAY...MOSTLY SUNNY. HIGHS IN THE MID 70S. NORTHWEST WINDS AROUND 5 MPH.

.TUESDAY NIGHT...PARTLY CLOUDY. SLIGHT CHANCE OF SHOWERS AND THUNDERSTORMS. LOWS IN THE MID 50S. LIGHT WINDS.

.WEDNESDAY...MOSTLY SUNNY. SLIGHT CHANCE OF SHOWERS AND THUNDERSTORMS. HIGHS IN THE LOWER 70S. NORTHWEST WINDS AROUND 5 MPH.

.WEDNESDAY NIGHT...PARTLY CLOUDY. SLIGHT CHANCE OF SHOWERS AND THUNDERSTORMS. LOWS IN THE LOWER 50S. NORTHWEST WINDS AROUND 5 MPH.

.THURSDAY...MOSTLY SUNNY. SLIGHT CHANCE OF SHOWERS AND THUNDERSTORMS. HIGHS IN THE UPPER 60S. NORTHWEST WINDS AROUND 10 MPH.

Incident Objectives	1. Incident Name <i>Juneberry Road Fire</i>	2. Date Prepared <i>8/30/2012</i>	3. Time Prepared <i>1830</i>
4. Operational Period (Date and Time) <i>August 30 - September 4, 2012 0700 - 1930</i>			
5. General Control Objectives for the Incident (include Alternatives)			
<i>Ensure firefighter and public safety. Review the 10 Standard Firefighting Orders and 18 Watch Out Situations by all line supervisors.</i>			
<i>Protect all structures within the fire perimeter or adjacent to the fire.</i>			
<i>Secure all control lines and one hundred percent mop-up of peat on the Juneberry Road Fire.</i>			
<i>Rehab all dozer lines and level areas after extinguishment.</i>			
<i>Support local initial attack of wildfires and assume command of extended attack incidents as requested by the Warroad area forestry fire staff.</i>			
6. Weather Forecast for Operational Period			
<p>Friday Sunny, with a high near 79. Light and variable wind. Friday Night Mostly clear, with a low around 52. Southeast wind 5 to 8 mph. Saturday Mostly sunny, with a high near 82. South southeast wind 8 to 18 mph, with gusts as high as 22 mph. Saturday Night A 40 percent chance of showers and thunderstorms. Mostly cloudy, with a low around 66. South southeast wind 13 to 17 mph, with gusts as high as 21 mph. New rainfall amounts of less than a tenth of an inch, except higher amounts possible in thunderstorms. Sunday A 40 percent chance of showers and thunderstorms. Partly sunny, with a high near 84. New rainfall amounts between a tenth and quarter of an inch, except higher amounts possible in thunderstorms. Sunday Night A 20 percent chance of showers and thunderstorms. Partly cloudy, with a low around 58. Labor Day Sunny, with a high near 79. Monday Night Mostly clear, with a low around 54. Tuesday Mostly sunny, with a high near 76.</p>			
7. General Safety Message			
<i>Keep an eye on the weather and on each other.</i>

Medical Plan Attachment C – Evacuation/ Transport Plan

General Information:

- Communicate all injuries/illnesses, as outlined in the ICS 206 Block 8.
- Use 911 for Emergency medical response and transport for injuries/illnesses.
- Notify direct supervisor of any injury or illness. DIVS or designee will coordinate evacuation of the patient.
- Contact closest available medically trained personnel.
- On-site incident personnel will move ill or injured patient to the nearest road, for transport.
- Request additional equipment or supplies needed to move patient.
- Incident personnel with medical training (if available) should accompany patients during the move until transferred to ground or air ambulance personnel.
- Medically trained resources are identified in the IAP (see ICS 204, Division Assignment List).

Time frame from ICP to Fire Line is approximately 15 minutes by ground.

Transport time to nearest hospital (Roseau) is approximately 30 minutes by ground.

The landing zone (LZ) for an Air ambulance is the Juneberry road asphalt area on the North West end of the fire on county road 7; GPS coordinates: Lat. 48.849 N Long. 96.300 W. For a serious injury, where ALS is needed, an air ambulance should be called. If needed, use tracked vehicles for patient transport to road.

If extrication is needed, contact the Roseau County Sheriff dispatch for specific rescue needs through 911.

In case of any wasp/hornet sting.

Anyone stung on the fireline should be evaluated by EMT's or Paramedic. If patient is not ambulatory or is deteriorating, contact the paramedic immediately.

Bee and Wasp Stings

Bees & Wasps can cause a severe allergic reaction (Anaphylactic Shock) in some people if bitten or stung. Allergic reactions to bee and wasp stings can develop anywhere on the body and may include non-life-threatening reactions such as hives, swelling, nausea, vomiting, abdominal cramps, and headaches. Life-threatening reactions such as Anaphylactic Shock, dizziness, unconsciousness, difficulty in breathing, swelling of the hands, face & extremities, nausea & vomiting, and in some cases a feeling of impending doom, and laryngeal blockage resulting from swelling in the throat require immediate medical care. Symptoms can begin immediately following the sting or up to 30 minutes later and may last for hours.

Most of the time, yellow jacket stings will amount to nothing more than a slight discomfort for a short period. However, there will always be the chance it will be far more serious. Being prepared and aware of the potential problem is the key to eliminating deaths caused by severe allergic reaction. Almost anyone can have an allergic reaction; especially a highly fatigued firefighter or a person who had a previous sting and has produced anti-bodies that could result in allergies.

Prevention

- Patients susceptible to bee stings and or have had Anaphylactic Shock in the past, should carry a bee sting kit.
- If you start to feel an allergic reaction coming on, contact medical help immediately. Oral and topical antihistamines should help prevent or reduce the itching and swelling. Try not to rub or scratch the sting site, because microbes from the surface of the skin could be introduced into the wound and result in an infection.
- Bees and wasps can be attracted to, or may react to, odors in the environment. Avoid using perfume, cologne, lotion, or scented soaps—any of these can attract wasps.
- If you remain calm when a bee or wasp lands on your skin to inspect a smell or to get water if you are sweating heavily, the insect will eventually leave of its own accord. If you don't want to wait for it to leave, gently and slowly brush it away with a piece of paper.
- Stinging incidents often occur when nesting areas of social insects are disturbed. Be observant of the area around you. If you see insects flying to and from a particular place, avoid it.
- Most insect repellants are not effective against wasps.
- When eating meals where wasps are active, place a small amount of anything containing sugar where it can easily be reached just outside the eating area.
