Wildland Fire Qualification System
February 2015

The Wildland Fire Qualification System Guide (PMS 310-1) now includes National Incident Command System (NIMS) training requirements.

- Anyone with an open task book and all future trainees will have to complete NIMS training before being considered for NWCG certification:
  - **IS-100.b - (ICS 100) Introduction to Incident Command System**
  - **IS-700 NIMS, an Introduction**
  - **IS-800.b National Response Framework, An Introduction**

- All certified emergency response personnel are required to complete these online courses to remain qualified for their current position/s.
- NWCG will not accept FEMA independent study IS-200 Basic ICS. You must now complete NWCG I-200 Basic ICS (classroom) if I-200 is a requirement for your position.
  - (CTSP and GISS do not require NWCG I-200)
- Forward copies of course completion certificates to todd.manley@state.mn.us so proper credit can be given towards NWCG certifications.
