

Task Force members,

The T2IA subcommittee is interested in formalizing the MNCC coordinators role, or designee, in the T2IA crew program. As you may know, in the past the center coordinators have been significantly involved in the crew program, from the crew application process, to cohesion meeting facilitation and being the main point of contact when a crew is on assignment among other things. We would appreciate clarification on the role of the position as it applies to the T2IA crew program and what level of involvement we can expect from the position. We would like to have this formalized if possible prior to the crew subcommittee meeting on February 3rd. Additionally, in this unique time of uncertainty any advanced notice that could be made in regards to suspending or modifying how the crews will operate next season would be appreciated.

Thank you, T2IA subcommittee

Contact Jason Westholter if you have any further questions.
