

Lessons Learned 45 Minutes

Pework

Pick two lessons learned articles linked in this document to print and discuss with the class. Choose 2 lessons that are local in nature, that will resonate with your audience.

Develop discussion questions that are relevant to the article.

Scenario

If the 2024 Year in review video is available, you may play that at the start of the unit.

<https://www.nwcg.gov/training-courses/wfstar-catalog>

Break students into groups of 3-6. Review the main lessons learned document

What lessons should out to you the most?

In your daily work, (fire or not) are you prepared to handle a medical emergency?

What can make you more prepared?

Have you run a medical training scenario at your local office? If not, why not? Are you willing to run a training scenario at your local office to practice?

Hand out the two lessons learned articles you chose.

Provide time for the students to read the articles, then provide time to answer the discussion questions at their groups.
